I started studying Information Systems in a 3-year technical course in the Federal Center of Technological Education. As soon as I finished the technical course, I entered a Bachelor's degree in Information Systems, at the same institution. At that time, I was co-author of a short article published in Brazilian Symposium on Multimedia and the Web (WebMedia), the main event of the theme in Brazil.

I have been working with desktop, web and mobile applications development since 2013. In this period, I have been also dealing with continuous integration and continuous delivery, and managing resources on AWS.

I seek to acquire knowledge and experience through new projects and courses, in addition to my work.

EXPERIENCE

Web Developer

O2 Filmes

Oct 2018 – Ongoing

Remote

- Developing backend using Ruby on Rails
- Developing frontend using React
- Working on Etherpad and Prosemirror – customizable open source editors
- Writing integration and unit tests using Mocha, WebdriverIO, Enzyme and Rspec
- Managing infrastructure with AWS and Terraform
- Reviewing code
- Working by Kanban system

Command line

Bash script

- Developing desktop application using Electron
- Deploying mobile app to Google Play store
- Integrating mobile app with other devices, such as thermal printer and QR code reader
- Developing software to import government-issued invoices
- Reviewing code
- Managing NoSql databases
- Working by Scrum framework

Web Developer

Crafters Innovation Studio

 Jan 2017 – May 2017

 Remote

- Developing web applications using Ruby on Rails
- Testing software using Rspec, adopting 100% of software coverage
- Reviewing code
- Working by Kanban system

.NET Developer

R2MS

 Feb 2013 – Jan 2017

 Nova Friburgo, RJ, Brazil

- Developing desktop and web applications using .NET Framework
- Developing user interfaces using WPF
- Developing web applications frontend using Node
- Integrating desktop application with fingerprint devices
- Developing software to import government-issued invoices
- Building and distributing installers for desktop applications
- Managing Mysql databases
- Experiencing different technologies, such as: C#, XML, HTML, CSS, SQL

EDUCATION

Technical Course in Industrial Computing

Federal Center of Technological Education

 2009 – 2012

 Nova Friburgo, RJ, Brazil

Bachelor's degree in Information Systems
